Hi Dan

What a mess! Hope you are not getting too much sh___ over the accident.

The attached is from a toxicologist that I used to work with in CA.

David

David L. Berry, Ph.D.

Senior Toxicologist, Ecosystems Protection and Remediation

U.S. EPA Region 8 [8EPR-S]

1595 Wynkoop Street

Denver, CO 80202-1129

Phone: 303-312-6358

FAX: 303-312-7151

David, It looks like your EPA Region 8 crew fucked up big time. The news here has photos of yellow river and not the 'natural' yellow either. Now how do they propose to remedy this mess?

I bet your EPA crew said, "Whoops", or something to that effect. Your tax dollars at work....

"Reporting on how the breach occurred, Colorado Public Radio says that **an EPA team used heavy equipment to dig into a dam at the Gold King Mine site**, hoping to install a drain pipe. But because of the volume of water and the dam's makeup of soil and not rock, it spewed zinc, iron and contaminants into a runoff channel that leads to the nearby creek."

toxic mess, Rich and I have fished this area - Animas one of the best trout streams in So Colorado, runs right thru Duango
